Executive summary on 2002 Missouri vehicle stops

- Background
- Statewide Findings
- Analysis by Attorney General Nixon
- Appendix A: Local traffic stops in proportion to state racial composition
- Appendix B: Disparity indexes for 2000-2002 are compared

I. BACKGROUND

Concerns by the citizens of Missouri and the Missouri legislature regarding allegations of racial profiling by law enforcement prompted the passage of state law Section 590.650, RSMo (2000), which was enacted Aug. 28, 2000. Racial profiling has been defined as the inappropriate use of race by law enforcement when making a decision to stop, search or arrest a motorist.

Missouri's state law requires that all peace officers in the state report specific information including a driver's race for each traffic stop made in the state. Law enforcement agencies are required to turn in the data to the Attorney General, and the Attorney General is required to compile the data and report to the Governor no later than June 1 of each year. The law allows the Governor to withhold state funds for any agency which does not comply with the law. State law requires that all information be reported to the Attorney General's Office by March 1.

The summary of statewide racial profiling data has been provided by Scott H. Decker, curator's professor of criminology and criminal justice; Richard Rosenfeld, professor of criminology and criminal justice; and Jeffrey Rojek, doctoral candidate in criminology and criminal justice; all at the University of Missouri-St. Louis.

Table 1. 2002 statewide summary of results

Key Indicators	Total	White	Black	Hispanic	Asian	Am. Indian	Other
Population	4,331,937	3,692,696	444,024	80,094	50,593	17,951	46,579

Stops	1,369,185	1,130,546	191,025	26,752	10,992	1,303	8,567
Searches	108,539	79,775	24,041	3,824	359	103	437
Arrests	79,576	57,400	18,817	2,690	271	79	319
Statewide population %	100%	85.24%	10.25%	1.85%	1.17%	.41%	1.08%
Disparity index	- - -	.97	1.36	1.05	.68	.23	.58
Search rate	7.93%	7.06%	12.59%	14.29%	3.27%	7.90%	5.10%
Contraband hit rate	21.08%	22.60%	17.47%	17.26%	14.76%	26.21%	19.91%
Arrest rate	5.81%	5.08%	9.85%	10.06%	2.47%	6.06%	3.72%

Notes: Population figures are from the 2000 census for persons 16 and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed race and unknown race.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 10.

[back to top]

II. STATEWIDE FINDINGS

This report summarizes the data from 620 law enforcement agencies in Missouri for 2002. This represents 86 percent of the 720 law enforcement agencies in the state. (An additional 41 of those agencies submitted letters indicating they made no traffic stops during the year.) The agencies filing reports recorded 1,369,185 traffic stops, resulting in 108,539 searches and 79,576 arrests. Table 1 breaks out the stops, searches and arrests by race and ethnic group.[1]

Four summary indicators are included in Table 1 that may be useful in initiating further assessments of racial profiling in traffic stops. The first, termed the "disparity index," relates each group's proportion of total traffic stops to its proportion of the driving-age population 16 and older.

A value of 1 on this index indicates that a group's proportion of traffic stops equals its population proportion: it is neither “under-represented” nor “over-represented” in traffic stops. Values above 1 indicate over-representation, and those below 1 indicate under-representation. For example, the 1,130,546 whites who were stopped accounted for 82.6 percent of all traffic stops in 2002.

According to the 2000 census, whites comprise 85.2 percent of Missouri's driving-age population. The value for whites on the disparity index is, therefore, .826/.852 or .97. Whites were stopped, in other words, at just slightly below the rate we would expect based on their fraction of the population.

The same is not the case for several of the other groups. African-Americans represent 10.3 percent of the population 16 and older but 14 percent of all traffic stops, for a value on the disparity index of 1.36. African-Americans were stopped at a rate 36 percent higher than expected based solely on their proportion of the population 16 and older. Hispanics were stopped at a rate slightly above their population proportion, and Asians, American Indians and persons of mixed or unknown race were stopped at a rate below their proportion of the population.

The values on the disparity index for the groups can be compared directly to one another. For example, the likelihood that an African-American motorist was stopped is 1.4 times that of a white motorist (1.36/.97). In other words, African-Americans were 40 percent more likely

than whites to be stopped in 2002.

The disparity index is a gauge of the likelihood drivers of a given race or ethnic group are stopped based on their proportion of the residential population 16 and older, and not of the population of motorists on the state's streets, roads, and highways. A group's share of the residential population 16 and older may or may not equal its proportion of drivers. Although in most instances the two proportions should be close, that may not always be the case.

The extremely low index values for American Indians, for example, could indicate that they are under-represented among the state's motorists. In addition, motorists from other states are stopped on Missouri's roadways. To the extent that out-of-state drivers do not reflect the race and ethnic composition of Missouri's population, the disparity index will not accurately portray the probability that Missouri residents are stopped.

The second indicator that can be used to assess racial profiling is the "search rate," or the number of searches divided by the number of stops (x 100). The search rate for all motorists who were stopped is 7.93 percent. Whites and American Indians were searched at rates close to the statewide average. (Searches include searches of drivers or property in the vehicle.) Asians were searched at a rate well below the statewide average, and blacks and Hispanics were searched at rates above the average for all motorists who were stopped.

The search rate for the different groups also can be compared directly with one another. Blacks were 1.78 times more likely to be searched than whites (12.59/7.06); Hispanics were more than twice as likely as whites to be searched (14.29/7.06).

The reasons for conducting a search and the outcome of the search (such as finding contraband) should be considered when making comparisons across groups. Some searches are conducted with the consent of the driver, or because the officer observed suspected contraband in plain view, had reasonable suspicion that an individual may possess a weapon (Terry search), or other reasons. These searches may or may not result in an arrest.

Other searches are conducted incident to arrest — this means that there is no other reason given for the search other than arrest. Searches are almost always performed when there is an outstanding warrant.

The third summary indicator, the "contraband hit rate," reflects the percentage of searches in which contraband is found. Contraband is found in 21.1 percent of all searches conducted. However, there is considerable variation in the contraband hit rate across race and ethnic groups.

The contraband hit rate for whites was 22.6 percent, compared with 17.5 percent for blacks and 17.3 percent for Hispanics. This means that, on average, searches of blacks and Hispanics produce less contraband than do those of whites. This difference is most likely attributable to the higher arrest rates for blacks and Hispanics, circumstances that compel a search.

The "arrest rate" is the fourth summary indicator included in Table 1 that may be useful for assessing racial profiling. Just under 6 percent of all traffic stops resulted in an arrest (79,576/1,369,185). The probability of arrest varies across the race and ethnic groups. Approximately 10 percent of the stops of African Americans and Hispanics resulted in arrest, compared with about 5 percent of the stops of whites. African Americans and Hispanics are stopped and searched more often than whites, but they are arrested more often as well.

This year's report compares (PDF file 1,465K) the 2002 disparity index to the disparity indexes for 2002, 2001 and 2000.[2]

For each agency, the disparity index for each race-ethnic group is presented for the years 2000, 2001 and 2002. For the state as a whole, the key indicators show only small changes between 2001 and 2002. The largest change is registered in the contraband hit rate (the fraction of searches in which contraband is found) for Hispanics. In 2001, 10.6 percent of searches of Hispanics resulted in contraband, compared with a contraband hit rate of 17.3 percent for Hispanics in 2002.

A reasoned determination of the existence of racial profiling in a community requires a comprehensive evaluation of the full range of information compiled in the agency reports. This brief summary of selected indicators for the state as a whole is intended to stimulate those local evaluations and dialogue.

III. ANALYSIS BY ATTORNEY GENERAL JAY NIXON

This is the third annual analysis of traffic stops issued by the Attorney General's Office under Section 590.650 RSMo (2000), and the second compiling a full 12 months of data. Our analysis shows the 2002 data confirms the racial disparities reported for 2001, the first full year of data, and does nothing to dispel the prevalent perception that African Americans are stopped at a disproportionate rate compared to whites, and that both African Americans and Hispanics are searched at disproportionately high rates. These disparities remain significant, and are cause for concern.

Statistical disproportion, however, does not prove that law enforcement decisions involving traffic stops are being based solely on inappropriate factors. Racial profiling, as a matter of policy or individual practice, can neither be proved nor disproved by statistics alone. Nevertheless, these statistics provide objective evidence of a disproportion that many perceive to be a result of bias, and should be cause for heightened public awareness and debate about this issue.

In 2000, Missouri became a national leader in committing resources to assessing racial disparities in traffic stops and eliminating them. The overwhelming majority of law enforcement agencies and their officers have diligently complied with Missouri law requiring that this information be collected and have worked with this office to ensure that our analysis is as accurate as possible. In addition, Missouri law now requires every agency to have a written policy regarding racial profiling; to provide additional training to its officers about the prohibition against this practice; and to promote the use of effective, non-combative methods for carrying out law enforcement duties in a racially and culturally diverse environment.

The 2002 data clearly refutes suspicions raised by some that collection of this information would result in "de-policing" or, in other words, a willful refusal of law enforcement officials to do their jobs. Law enforcement officers around the state, despite being outnumbered, overworked, and underpaid, continue to serve the public and faithfully discharge their duties as they always have and, I believe, always will.

Though, as I have noted and as the data shows, there is cause for concern and heightened scrutiny about the disproportionate number of traffic stops involving African Americans as well as the disproportionate number of ensuing searches of African Americans and Hispanics, it is important to note that it is law enforcement agencies and their officers themselves that are supplying this data and reacting to the disparities.

I applaud the efforts of law enforcement in helping to shed light on this issue, and I have referred those agencies (59 out of 720) that did not meet the reporting deadlines to the Governor for imposition of the statutory sanctions.

Section II of this report, titled Statewide Findings, provides an analysis of the 2002 data, and compares that information to prior years. This analysis is done statewide and is not a reflection on any individual jurisdiction. In addition, as with any statistical analysis, there are limitations in the data that caution against drawing conclusions on less than the overall study.

Within any jurisdiction — perhaps within every jurisdiction — there are factors such as interstate highways, shopping centers and high-crime areas necessitating increased patrols that can affect the statistics reported. Factors may vary from jurisdiction to jurisdiction that impact the demographics of the drivers in that jurisdiction as opposed to the residents in that jurisdiction. Finally, it should be remembered that the

residential demographics are drawn by necessity from the 2000 census, which is an increasingly inaccurate depiction of Missouri demographics today.

Whatever the limitations of the data may be, however, they do not explain the disparities revealed by the data on a statewide basis. I believe that law-abiding Missourians have a right to travel throughout this state without fear that they will be stopped — an inconvenience at best and a humiliation at worst — based solely on their race or ethnicity. I know firsthand that Missourians of all races and law enforcement officers throughout our state share this belief. All of us must work together to ensure that this commitment will soon be reflected in the data that I am required by law to analyze and report.

[back to top]

FOOTNOTES

Footnote 1: The figures for whites, blacks, Asians, and American Indians in Table 1 represent the number of non-Hispanic persons 16 and older who designated that race alone in the 2000 Census. Hispanics may be of any race. About 1 percent of the population designated two or more races. These persons are included in the "Other" category along with persons of unknown race.

Footnote 2: Caution should be used when comparing 2000 to subsequent years, especially for smaller agencies, because the 2000 figures are based on only four months of traffic data, while those for 2001 and 2002 are based on the full calendar year.

Accuracy verification statement for agency reports

The Attorney General's Office made extensive efforts to verify and correct all forms where numbers appeared incomplete or inaccurate. Following the March 1 deadline, calls were made to a number of agencies regarding incomplete or inaccurate data. To the extent that corrections could be determined, they were incorporated into the report.

In addition, all agencies were given the opportunity to review their final reports before publication and to make comments. At that point, corrections again were made for agencies and their comments have been included on individual city data sheets under the heading "Agency response."

RACIAL PROFILING DATA/2002

Agency: Adair County Sheriff's Dept.

Population: 20,756
age 16 and over

KEY INDICATORS	Total	White	Black	Hispanic	Asian	Am. Indian	Other
Stops	146	143	2	1			
Searches	20	20	0	0			
Arrests	11	11	0	0			
Statewide population %	N/A	85.24	10.25	1.85	1.17	0.41	1.08
Local population %	N/A	95.14	1.22	1.13			
Disparity index	N/A	1.03	1.12	0.60			
Search rate	13.70	13.99	0.00	0.00			
Contraband hit rate	30.00	30.00	#Error	#Error			
Arrest rate	7.53	7.69	0.00	0.00			

Notes: Population figures are from the 2000 Census for persons16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed race and unknown race.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.
Contraband hit rate = (searches with contraband found / total searches) X 100.
Arrest rate = (arrests / stops) X 100. #Error indicates zero denominator.

Agency response

Due to the major state highways that run through our jurisdiction (state routes 115 and 180), there is an abundance of commuter traffic traveling through our city. The following are the demographics of black residents in bordering municipalities: Bel-Ridge: 80%, Pagedale: 92%, Berkeley: 77%, Normandy: 61%.

Agency response

The city population has been adjusted from 2,477 to 5,166 in 2002. We have a men's correctional center located within our city limits (NECC) and a women's correctional center located within 15 miles on Highway 54. The police department observes much traffic coming and going from these facilities by workers, sales representatives, construction crews, doctors, dentists, attorneys, family members and other visitors. The city has two major fuel centers located on U.S. Highway 61 (Phillips 66 and Shell) and four other convenience stores on Business Highway 61 for those traveling along U.S. Highway 21 and Highway 54. Located within the city limits is a 64-room Super 8 Motel which can house up to approximately 200 persons, also located on U.S. Highway 61. Located within the city limits is the original homestead of Champ Clark, a historical attraction for many people. We have seen an increase in residential and commercial construction, thus resulting in more vehicular traffic.

Agency response

Camden County is a tourist area, with a large influx of persons during the summer months. Of the total traffic stops, 53.68% were of non-residents. There are several large resorts and several businesses in the area that employ unskilled labor from labor management companies. Numerous residents of adjoining counties also commute to this county for employment and recreation.
Of the eight searches of black motorists, two were duplicates (entered twice).
Of the nine searches of Hispanic motorists, one was a duplicate (entered twice).
Of the 2,681 traffic stops of whites, 53% were not residents of this county.
Of the 46 traffic stops of blacks, 69.5% were not residents of this county.
Of the 36 traffic stops of Hispanics, 58.33 were not residents of this county.
Of the one traffic stop of an American Indian/Alaskan Indian, 100% were not residents of this county.
Of the six traffic stops of Asians, 66.66% were not residents of this county.

Agency response

The following are conditions that may impact our minority contacts:
Chesterfield Mall – A major shopping mall located on 86 acres in the center of Chesterfield has four major department stores and 140 smaller stores comprising 1.5 million square feet of shopping area.
Spirit of St. Louis Airport – The largest reliever airport in the state, is also the second busiest in the state, and is within the Chesterfield city limits.
13 miles of Interstate 64/U.S. Highway 40 runs through the city, virtually splitting the city in to a north and south area.

RACIAL PROFILING DATA/2002

Agency: Chilhowee Police Dept.

Population: 256
age 16 and over

Agency response

The village of Claycomo is surrounded by Kansas City on three sides. In addition, two interstate highways, I-35 and I-435, run through the village. The village of Claycomo is home to the Ford-Claycomo assembly plant, which employs over 6,000 workers, in addition to vendors and outside contractors who travel through the village on a daily basis. The Claycomo Police Department has created a “traffic office” position, which was developed to improve highway safety for the citizens of Claycomo and those who visit or are employed in the village. The creation of this position has lead to an increase in the amount of traffic stops performed by the Claycomo Police Department. However, this enforcement has reduced traffic accidents and personal injuries/fatalities.

Agency response

The city of Clayton is the county seat for St. Louis County. It contains the courts, government offices, juvenile detention center and the St. Louis County Justice Center, which houses over 1,200 inmates. In addition, Clayton is the home of several major corporations and contains over 6.5 million square feet of office space and one million square feet of retail. It is estimated that over 80,000 people visit Clayton on a daily basis to work, shop, or do business. Most of those visiting Clayton reside in the St. Louis Metropolitan area. Additionally, a number of major thoroughfares run through Clayton carrying commuters from various parts of the county requiring a significant amount of traffic enforcement: I-170, Forest Park Parkway, Hanley Road, Clayton Road, Brentwood Boulevard and Forsyth Boulevard. Therefore, it is felt that for the purposes of this study, the racial makeup of the population should be in direct proportion to that of the St. Louis Metropolitan area. This is supported by the fact that only 6% of the vehicles stopped during 2002 were actually residents of Clayton.

Agency response

The city of Clinton is located on the main route between the Kansas City Metropolitan area and the city of Springfield. As a consequence, a large number of non-Clinton residents pass through the city of Clinton. In fact, 49% of all traffic stops made by the Clinton Police Department involve non-resident drivers. In addition, 36% of all traffic stops made by the Clinton Police Department take place on state highways. Given the large number of non-resident drivers stopped on state highways for traffic violations, any comparisons utilizing the population of the city of Clinton are inherently flawed.

Agency response

The city of Creve Coeur is a “crossroads” in the St. Louis Metropolitan area, having five major roadways (interstate and state designated highways) passing through or immediately adjacent to the city. Creve Coeur is home to numerous employees and businesses, as well as one of the largest medical services communities in the region. Drivers of all races regularly visit and/or work in Creve Coeur, resulting in a greater representation of minorities than reflected by the city’s population and ultimately a higher disparity index. Creve Coeur is ranked in the top 20 communities in Missouri regarding traffic collisions, not to mention the city is currently involved in a work-zone project along two major roadways. To that end, the Creve Coeur Police Department executes an aggressive traffic safety program. The Creve Coeur Police Department strives to be professional in all public contacts.

Agency response

The city of Festus has a large interstate highway (I-55) that runs down the middle of the city. This interstate brings several thousand people from outside the area to our city. Our city also has several large retail establishments that people from all over come to patronize. There are several restaurants, gas stations and hotels near our interstate exits that have the ability to cater to a large driving population.

Agency response

The present method used to determine profiling is not truly reflective, because it is based solely on the population of the jurisdiction served and does not take into consideration the major highways and arterial roads, as well as large shopping districts and the number of individuals employed within the jurisdiction. Furthermore, until the mentioned factors are taken into account, any inferences to racial profiling cannot and should not be concluded. This department does not and will not tolerate any enforcement based solely on race or gender.

Agency response

The city of Gladstone has three state highways and one interstate highway that run through the area. In addition there is a major home improvement center located in the southwest corner of the city. This is a center that draws retail business from throughout the area including residents from the state of Kansas. This center also is located in close proximity to three of the four highways that run through Gladstone. It should also be noted that the city of Gladstone is entirely landlocked by Kansas City, Missouri with major thoroughfares that allow travel by Kansas City residents. A review of the data submitted shows that 21% of the blacks and 15% of the Native Americans that my officers came into contact with occurred during stops on the highways that run through our city. In addition, when looking at the resident status of the drivers stopped 15% of the black drivers, 30% of the Hispanic drivers, and 21% of the Native American drivers were Gladstone residents. This would indicate that the majority of the drivers in each instance lived somewhere other than Gladstone. If this information was being utilized in the calculation of the disparity index, which measures against the community's population figures, then the disparity index should drop proportionately.

Agency response

Glendale is a bedroom community in St. Louis County. Although we have a small minority population, we share borders with the cities of Kirkwood, Rock Hill and Webster Groves, who have a more diverse population. Missouri State Route 100 is a highly traveled east/west thoroughfare, which is our northern boundary. Berry Road and Lockwood Boulevard are major streets that convey traffic to Interstate 44, which is just south of our city limits. There are four major shopping centers within a short driving distance. (Average daily traffic counts as of October 2000: State Route 100 - 29,046; Berry Road - 9,590; Lockwood Boulevard - 11,490; Sappington Road - 7,000)

Agency response

The information contained within this report indicates that the “disparity index” for stopping blacks in Grain Valley is 7.92, which indicates over representation. It should be noted that of the 1,454 stops made by Grain Valley Police for the year 2002, there were only 47 blacks stopped. However, because of the number of blacks stopped and the small local population of blacks in Grain Valley (0.41%), the "disparity index" calculation results in an over-inflated number. Additionally, I-70 runs through the community with east and west bound exit ramps into Grain Valley where large numbers of motorists stop because of the three service stations/truck stops that are located adjacent to the interstate. Also Grain Valley is located within the metroplex of Kansas City that has a relatively large black population. In conclusion, I don't believe from the "disparity index" one can conclude Grain Valley Police are targeting blacks as indicated by the raw numbers versus the index figures.

Agency response

Harrisonville is located approximately 30 miles south of Kansas City on U.S. Hwy. 71. This highway and several state highways are used daily by commuters driving to and from their places of employment in the Kansas City Metropolitan area. There thoroughfares are also used by countless numbers of families traveling back and forth to the lakes and vacation spots around the state.

Agency response

The city of Hazelwood has three major highways within our jurisdiction: I-270 which travels through the city; I-70, which culminates in the city at I-270; and Highway 370. In addition, the city also has three major north/south arterial roadways through our city, which are Lindbergh Blvd. (US 67), Hanley Road and Howdershell Road. The average daily traffic flow on these six roadways is approximately 300,000 vehicles daily. The city of Hazelwood is home to over 850 businesses, including the Ford Motor Company Assembly Plant, Boeing Corporation, Malinkrodt Inc., General Motors Parts Plant, United States Postal Service Bulk Mail Facility, IBM, etc. These businesses employ thousands of individuals from across the metropolitan area, including the state of Illinois and the surrounding Missouri counties of St. Charles, Jefferson, Franklin, etc. who travel the streets of the city of Hazelwood to and from their places of employment.

Agency response

When the total minority population of the county is less than 1%, a single traffic stop creates a statistical aberration in the disparity index. This is evident in the distortion reflected for Hickory County caused by one traffic stop of one black motorist for the entire year of 2002.

Agency response

The Higginsville Police Department patrols a 7-mile section of Missouri Highway 13 which intersects with I-70. Many vehicle stops do not involve the local population. Numerous orchards are located to the north of Higginsville. Seasonal workers live in the area but are not counted in the census population totals.

Agency response

U.S. Highway 54, connecting I-70 and Jefferson City, runs through the middle of the city. In most stops the officer does not know the apparent race of the driver until after the stop is conducted. The city of Holts Summit has two activity rental facilities available. The facilities are rented by large groups of blacks and Hispanics on a regular basis, significantly increasing the percentage of those races in our local population.

Agency response

RACIAL PROFILING DATA/2002

Agency: Houston Police Dept.

Population: 1,638
age 16 and over

KEY INDICATORS	Total	White	Black	Hispanic	Asian	Am. Indian	Other
Stops	451	445	6				
Searches	33	33	0				
Arrests	21	21	0				
Statewide population %	N/A	85.24	10.25	1.85	1.17	0.41	1.08
Local population %	N/A	95.73	0.06				
Disparity index	N/A	1.03	21.79				
Search rate	7.32	7.42	0.00				
Contraband hit rate	21.21	21.21	#Error				
Arrest rate	4.66	4.72	0.00				

Notes: Population figures are from the 2000 Census for persons16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed race and unknown race.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.
Contraband hit rate = (searches with contraband found / total searches) X 100.
Arrest rate = (arrests / stops) X 100. #Error indicates zero denominator.

Agency response

The Independence Police Department, an internationally accredited law enforcement agency, by policy and practice, does not tolerate any form of bias-based profiling. The racial makeup of our motoring public does not reflect the racial makeup of our population due to our close proximity to KCMO and other neighboring cities with significant minority populations. Other factors include major east/west highways entering the city, including I-70, KCMO public schools in Independence, major retail shopping and entertainment destinations, and a lack of IA complaints from motorists citing racial profiling as the basis for being stopped.

RACIAL PROFILING DATA/2002

Agency: Iron County Sheriff's Dept.

Population: 8,391
age 16 and over

Agency response

The report prepared by the Attorney General's Office may provide an incomplete picture of traffic stop activities by the Joplin Police Department and other Missouri law enforcement agencies, by comparing individual agency traffic stop data against local jurisdiction demographics collected in the 2000 census. For those agencies whose officers are likely to encounter a high proportion of non-residents traveling through their jurisdiction, demographics of the driving population could be significantly different from the demographics of the agency's resident population. A 1999 study for the city of Joplin indicated that 28% of the vehicles entering Joplin each day are registered outside the city of Joplin. The presence of large employment, retail, commercial and medical sites within Joplin results in a daily service population in excess of 225,000, five times greater than the resident population. Until valid data on the demographics of "the population of minority groups residing or traveling within the jurisdiction" is generated, comparisons of traffic stop data to local resident population demographics could easily lead to erroneous conclusions about law enforcement activities.

Agency response

While the data contained in this report represents the overall number of stops, searches and arrests collected by the Kansas City Missouri Police Department, the disparity indexes have not fluctuated significantly since the data collection began in 2000. However, these number should still be interpreted cautiously. Specifically, relying on the census population for ages 16 and over as a benchmark does not provide a realistic picture of the driving population in Kansas City, Missouri at any given time. There are several major thoroughfares that run through the city, including I-29, I-35 and I-70 that contain a large percentage of drivers not reflected in the static census population used for comparison purposes. Additionally, Kansas City is contained within a metropolitan population of approximately 1.5 million, which adds to the commuter population on the major thoroughfares. The report also indicates that a disproportionate number of persons searched were black (64%) as compared to white (28%). One reason for this difference can be seen in an examination of searches incident to arrest. 68% of searches of black persons were conducted incident to arrest. Further, 57% of the searches incident to arrests were based on outstanding warrants. It should also be noted that KCPD views traffic stop data collection as one of many tools to address the issue of racial profiling. Other tools in use by the department include training, community programs and policies.

Agency response

Lafayette County has a major interstate highway that traverses the county from west to east. The majority of our traffic stops and arrests occur during the evening and night shift. Most of our stops and arrests are of persons that are not residents of our county, using the interstate highway or other state highways located within our county.

RACIAL PROFILING DATA/2002

Agency: LaGrange Police Dept.

Population: 781
age 16 and over

Agency response

This disparity represents blind enforcement. Officers rarely know the ethnicity of the violator while conducting enforcement activities, especially after dark.

Agency response

Interstate 70 borders Lake St. Louis on the north and U.S. Highway 40/61 passes through the city near our southern boundary. 47.8% of the traffic stops initiated with black drivers occurred on the interstate and 21.4% occurred on the U.S. highway. Most of the traffic stops involving black drivers (69.2%) were conducted on these major highways, not on city streets. It is reasonable, therefore, to consider the statewide population for minorities when evaluating the disparity index for our venue. When this criterion for comparison is used, the disparity index for blacks drops from 5.76 to 1.01. Similarly, 61.8% of traffic stops involving Hispanic drivers were conducted on these highways as were 36.4% of the stops involving American Indian drivers and 73% of stops with Asian drivers. 56.1% of stops conducted with white drivers occurred on one occurred on one or the other of these major highways.

Note: Several years ago our agency formed a dedicated traffic unit in response to concern over the number of fatal accidents that had occurred on the two major highways crossing our municipality. The goal of this unit is to increase enforcement of traffic laws, reduce hazardous moving violations in those areas and to save lives. The program has been very successful, resulting in hundreds of alcohol-impaired drivers being removed from the roads and lowering the number of fatal accidents reported the year before the program was initiated to zero deaths in 2002.

Agency response

The 20,840 population used in this report does not reflect the true demographics of the city of Maryland Heights. Maryland Heights has 1,813 businesses which employ 52,233 people. The city contains Harrah's Casino which had 6 million visitors in 2002. The 20,000-seat UMB Bank Pavilion Amphitheater had 380,000 visitors in 2002. The city has 20 hotels with 3,249 rooms. Maryland Heights has 61 liquor establishments selling alcohol by the drink. Finally, the section of I-270 in Maryland Heights has an average daily traffic count of 182,000 vehicles, the second highest in the state. The demographics of the 66,430,000 vehicles on I-270, the 6 million visitors to the casino, the 380,000 visitors to the amphitheater and the 52,233 people employed in Maryland Heights are not known but surely impact the validity of this report.

Agency response

The data submitted of 2002 was correctly reported, However the Milan community has a pork processing plant (Premium Standard Foods) that employs many Hispanics and some blacks. This racial population changes frequently, so the 2000 census may not accurately reflect the current population ratio. Also, many of the employees are within a 50-mile radius of Milan.

RACIAL PROFILING DATA/2002

Agency: Miller County Sheriff's Dept.

Population: 18,133
age 16 and over

KEY INDICATORS	Total	White	Black	Hispanic	Asian	Am. Indian	Other

Agency response

We have a state penitentiary that opened in our county in October of 2001, employing approximately 400. Interstate 57 runs the full length of our county connecting major cities such as Chicago to Tulsa and Chicago to Memphis.

Agency response

The city of Monett has a large population of stationary and migrant Hispanics due to the large number of poultry processing plants in Monett and the surrounding area.

Agency response

It is significant that our community is located adjacent to an interstate highway with a major shopping mall. It is obvious that a total of three non-white searches cannot be statistically or otherwise significant of any factors regarding racial profiling. This law requires a substantial increase in paperwork for this department. The members of the state legislature should be cognizant of the fact that no extra funding came with this law and other laws that have been recently passed.

RACIAL PROFILING DATA/2002

Agency response

The city of Olivette has two major highways within its boundaries - I-70 is on the east and Highway 340 (Olive Blvd.) is a pipeline connecting thousands of people traveling into and through Olivette for business and pleasure. Olivette has several employers that employ hundreds of people. Over 53,000 vehicles utilize Olive Blvd. each day. Traffic enforcement along with vehicle accident investigations and other highway incidents is a majority of the police department duties. In 2002 we increased the traffic enforcement which lowered the accident rate. The Olivette Police Department is committed to making the streets within our boundaries as safe as possible for all people living, visiting, working or traveling through our city.

Agency response

We have two banks, one feed store and two convenience stores. We are opening a processing plant in November. Most people work in Springfield; this is farming country.

Agency response

The statistics for the year 2001 do not reflect addresses of all traffic stops, nor is it a requirement. At the beginning of 2002, we began to include the addresses of all traffic stops, These statistics show that approximately 70% of the persons stopped do not live in our city.

Agency response

The city of Richmond Heights is a 2.8 sq. mile city located on the western boundaries of the city of St. Louis. Richmond Heights has three miles of U.S. 64 (Highway 40) running directly through it. Highway I-170 runs north and south from U.S. 64. Located in the city limits is the Galleria shopping mall. The Galleria mall generates approximately 10 million shoppers or visitors each year. Richmond Heights has numerous office buildings including the 23-story University Club Towers office building. Richmond Heights also borders the city of Clayton, which is the county seat for St. Louis County. Thousands of vehicles travel through Richmond Heights on a daily basis due to its geographic location.

Agency response

The Shrewsbury Police Department is committed to the fair treatment of all citizens and visitors of our community. We support the Missouri Attorney General's efforts to better understand traffic enforcement activity and patterns. However, since the data in the Attorney General's report is deceptive in nature and not interpretive, further analysis of traffic stops, arrests and searches is needed so that more meaningful interpretations of the data can be made. Race-neutral explanations need to be considered and ruled out before any possible conclusions relating to disparate treatment can be drawn. Furthermore, we believe it would be more prudent to examine traffic enforcement activity in terms of the population that travels upon a community's roadways rather than its resident population. This would allow the data to then be examined in a much more appropriate context that would take in to account the diversity of the surrounding region and the uniqueness of the motoring population of each individual community.

Agency response

The analysis does not consider the fact that 28% of the city's total traffic stops are non-residents. The Attorney General's analysis only compares the traffic stop data to the census population. Springfield is situated on Interstate 44 and is a destination for tourists traveling south to Branson and to the local Bass Pro Shops, the number one tourist attraction in the state of Missouri. Additionally, when examining the search rates, the probable cause/authority to search reasons should be taken into consideration.

Agency response

The city of St. Ann has several small shopping malls as well as one very large mall, Westfield Shoppingtown Northwest, which is located on St. Charles Rock Road at Lindbergh. Many stores at the Westfield Shoppingtown have fashions and accessories that are marketed to the black community. Many African-Americans come from North St. Louis County, North St. Louis City and East St. Louis to shop at this mall. That will cause our black population to actually be several times greater than what the census shows. St. Ann also has an interstate highway (I-70) and it has an active speed enforcement program on that highway.

Agency response

There are unique circumstances that affect the demographics of Saint Charles City. There are two major interstate highways: I-70 and I-370 in St. Charles City providing access from east and west. There is a major state highway - Missouri Route 94 providing access north and south (although considered east/west) through St. Charles City. The Ameristar Casino in St. Charles City employs many individuals and has customers from the greater St. Louis Metropolitan area. Criminal activity in St. Charles City is to some degree attributable to persons who reside outside St. Charles City and who live in the greater St. Louis Metropolitan area. St. Charles City has several major shopping centers to include Bass Pro, Sam's Retail Outlet, Wal-Mart, Lowe's, Home Depot, Target Store, etc. Since the last census, there has been an influx of legal and illegal aliens into St. Charles City.

Agency response

The disparity index is skewed when comparing the number of stops to proportion of population. Our population is 11.87% black; however, 42.4% of summons issued to blacks were on a state highway. St. Charles Rock Road (Hwy. 180) traverses east to west through St. John and has a very high percentage of black motorists using this street as a direct conduit for shopping at Northwest Plaza, a large mall about two miles west of this city. Furthermore, there are three supermarkets along St. Charles Rock Road and one twenty-four hour store in St. John that are heavily shopped by blacks who live immediately to the east of St. John since there are no stores in their immediate vicinity. Immediately to the east of St. John is Pagedale, Wellston and St. Louis City which are 95-plus percent populated by black residents. Therefore, if the disparity index would be calculated based upon the proportion of stops divided by the percentage of blacks driving on the streets through St. John, the results would be well below a value of one.

Agency response

The percent of total persons stopped during 2002 (white - 48.2%; black 48.6%) is proportional to the St. Louis population for persons age 16 and over (white 47.6%; black 46.6%). While the report reflects that 6.5% of the persons stopped were searched, a disproportionate number of the persons searched were black (77.2%) as compared to white (21.2%). One of the primary reasons for this difference is the requirement for a search incident to a lawful arrest. Of the persons searched because of this requirement, 78.8% were black as compared to 20.5% who were white. The major reason for an arrest was the existence of outstanding warrants (white - 140; black 1,020). Also, the number of blacks consenting to a search (609) was greater than the number of whites (192). The rates in the 2002 report remain consistent with the previous reports.

Agency response

While the data compiled in this report is informative, any conclusions drawn from the data must be tempered with common sense. For example, population data used to calculate the disparity index does not include members of the minority community that reside in the city of St. Louis and therefore increases the diversity of drivers on the roads within St. Louis County. Nor does the data reflect that in a majority of traffic stops, police officers do not know the race of the driver prior to initiating the traffic stop. The St. Louis County Police Department has a long standing policy prohibiting all investigative detentions, traffic stops, arrests, searches or seizures of property based solely on race, ethnicity, gender, sexual orientation, religious beliefs, disability or economic level. All commissioned officers participate in annual cultural diversity and sensitivity training and specialized training which prohibits the illegal practice of racial profiling. The St. Louis County Police Department will continue to gather and monitor the data required in this report to ensure our officers continue to respect the right of every individual.

Agency response

St. Robert has adjoining boundaries with a major army installation, Fort Leonard Wood, with a daytime population of approximately 30,000. St. Robert borders with heavy traffic on Interstate 44. The city accommodates many visitors during peak activities on Fort Leonard Wood such as basic training graduations and other events.

Agency response

Three major highways, two federal and one state, crisscross Town and Country and carry an estimated 400,000-plus vehicles through our community daily. The intersection of I-64 and I-270, located within the city, is reported to be one of the top five busiest intersections in the state. Analysis shows that the overwhelming majority of the department's traffic enforcement occurs on these three highways and that the city's residential population is in the minority in comparison to others traveling through, visiting, worshiping, shopping or working within its boundaries. It can be reasonably concluded that the racial makeup of those utilizing these highways is more proportionate to a combination of state, county and St. Louis City populations and associated ratios than to the city of Town and Country proper. Therefore, it is our belief that the city's traffic enforcement activities are in harmony with both the intent and provisions of the state's Racial Profiling Law requiring that vehicle stops be proportionate to the population groups residing or traveling within its jurisdiction.

Agency response

Our population is unique because of our role in the community. We are a university police department with approximately 15,000 students and another 3,000 faculty and staff personnel during the course of a day, and only 1,500 - 2,000 occupants at night. Our student population is a diverse mix of international students and local community participants. Furthermore the “transient” or “passing through” driving population is such that it is not measurable. There is no real community or city to base our population on that would be an accurate depiction of our university. In addition, the amount of visitors to our campus for various functions is also variable. It is unknown what percentages of stops are made on the university population and the number that is transient.

Agency response

The city of Webster Groves is less than two miles outside of the city of St. Louis and is part of a major metropolitan area whose population travels daily upon its streets. A major interstate highway and several north/south feeder streets are included in the traffic network and are heavily traveled by non-residents in their commute to work and business. In addition, Webster Groves has several shopping and recreational areas that are heavily patronized by a large number of non-residents. This transient population is well documented in that over 80% of traffic citations are issued to non-residents. Consequently, any statistical model not closely reflecting the populations of St. Louis City and County that travel through Webster Groves will not be reliable.

Agency response

The following is offered as additional information to further clarify and help put the data in fuller context. Located within the city limits are six major chain hotels and three major chain car rental agencies who employ Blacks as a large percentage of their work force. Woodson Terrace is bordered to the east by the city of Berkeley, whose majority population is black. Located within the city are two Mexican groceries, one Hispanic currency exchange, and an insurance brokerage firm whose primary clients and work force are Hispanic. I-70 and state highway 115 travel east and west through the city and state highway EE travels north and south with these major routes connecting Woodson Terrace to the surrounding and outlying area. The northern city limits adjoin Lambert St. Louis International Airport which attracts a diverse segment of the population (including black and Hispanic) with access gained via I-70 and state highway 115.

Agency response

RACIAL PROFILING DATA/2002

Agency: Wright City Police Dept.

Population: 1,131
age 16 and over

KEY INDICATORS	Total	White	Black	Hispanic	Asian	Am. Indian	Other
Stops	823	737	51	28	4		3
Searches	90	70	8	12	0		0
Arrests	47	35	7	5	0		0
Statewide population %	N/A	85.24	10.25	1.85	1.17	0.41	1.08
Local population %	N/A	88.15	5.84	4.51	0.09		0.80
Disparity index	N/A	1.02	1.06	0.75	5.50		0.46
Search rate	10.94	9.50	15.69	42.86	0.00		0.00
Contraband hit rate	14.44	17.14	12.50	0.00	#Error		#Error
Arrest rate	5.71	4.75	13.73	17.86	0.00		0.00

Notes: Population figures are from the 2000 Census for persons16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed race and unknown race.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.
Contraband hit rate = (searches with contraband found / total searches) X 100.
Arrest rate = (arrests / stops) X 100. #Error indicates zero denominator.

620. Wright County Sheriff's Dept.	1.06	0.26	2.00		0.88	0.92

Notes: Proportion of stops by racial category/proportion of statewide population of that racial category. A value of 1 indicates local stops within a racial category equivalent to that racial groups proportion in the state population. A value less than 1.0 indicates a lower proportion of stops of that racial group lower than its proportion in the state population. A value greater than 1.0 indicates a higher proportion of that racial group than its proportion of the statewide population.

Appendix B: Disparity indexes for 2002, 2001 and 2000 are compared

Agency response

Due to the major state highways that run through our jurisdiction (state routes 115 and 180), there is an abundance of commuter traffic traveling through our city. The following are the demographics of black residents in bordering municipalities: Bel-Ridge: 80%, Pagedale: 92%, Berkeley: 77%, Normandy: 61%.

Agency response

The city population has been adjusted from 2,477 to 5,166 in 2002. We have a men's correctional center located within our city limits (NECC) and a women's correctional center located within 15 miles on Highway 54. The police department observes much traffic coming and going from these facilities by workers, sales representatives, construction crews, doctors, dentists, attorneys, family members and other visitors. The city has two major fuel centers located on U.S. Highway 61 (Phillips 66 and Shell) and four other convenience stores on Business Highway 61 for those traveling along U.S. Highway 21 and Highway 54. Located within the city limits is a 64-room Super 8 Motel which can house up to approximately 200 persons, also located on U.S. Highway 61. Located within the city limits is the original homestead of Champ Clark, a historical attraction for many people. We have seen an increase in residential and commercial construction, thus resulting in more vehicular traffic.

Agency response

Camden County is a tourist area, with a large influx of persons during the summer months. Of the total traffic stops, 53.68% were of non-residents. There are several large resorts and several businesses in the area that employ unskilled labor from labor management companies. Numerous residents of adjoining counties also commute to this county for employment and recreation.
Of the eight searches of black motorists, two were duplicates (entered twice).
Of the nine searches of Hispanic motorists, one was a duplicate (entered twice).
Of the 2,681 traffic stops of whites, 53% were not residents of this county.
Of the 46 traffic stops of blacks, 69.5% were not residents of this county.
Of the 36 traffic stops of Hispanics, 58.33 were not residents of this county.
Of the one traffic stop of an American Indian/Alaskan Indian, 100% were not residents of this county.
Of the six traffic stops of Asians, 66.66% were not residents of this county.

Agency response

The following are conditions that may impact our minority contacts:
Chesterfield Mall – A major shopping mall located on 86 acres in the center of Chesterfield has four major department stores and 140 smaller stores comprising 1.5 million square feet of shopping area.
Spirit of St. Louis Airport – The largest reliever airport in the state, is also the second busiest in the state, and is within the Chesterfield city limits.
13 miles of Interstate 64/U.S. Highway 40 runs through the city, virtually splitting the city in to a north and south area.

Agency response

The village of Claycomo is surrounded by Kansas City on three sides. In addition, two interstate highways, I-35 and I-435, run through the village. The village of Claycomo is home to the Ford-Claycomo assembly plant, which employs over 6,000 workers, in addition to vendors and outside contractors who travel through the village on a daily basis. The Claycomo Police Department has created a “traffic office” position, which was developed to improve highway safety for the citizens of Claycomo and those who visit or are employed in the village. The creation of this position has lead to an increase in the amount of traffic stops performed by the Claycomo Police Department. However, this enforcement has reduced traffic accidents and personal injuries/fatalities.

Agency response

The city of Clayton is the county seat for St. Louis County. It contains the courts, government offices, juvenile detention center and the St. Louis County Justice Center, which houses over 1,200 inmates. In addition, Clayton is the home of several major corporations and contains over 6.5 million square feet of office space and one million square feet of retail. It is estimated that over 80,000 people visit Clayton on a daily basis to work, shop, or do business. Most of those visiting Clayton reside in the St. Louis Metropolitan area. Additionally, a number of major thoroughfares run through Clayton carrying commuters from various parts of the county requiring a significant amount of traffic enforcement: I-170, Forest Park Parkway, Hanley Road, Clayton Road, Brentwood Boulevard and Forsyth Boulevard. Therefore, it is felt that for the purposes of this study, the racial makeup of the population should be in direct proportion to that of the St. Louis Metropolitan area. This is supported by the fact that only 6% of the vehicles stopped during 2002 were actually residents of Clayton.

Agency response

The city of Clinton is located on the main route between the Kansas City Metropolitan area and the city of Springfield. As a consequence, a large number of non-Clinton residents pass through the city of Clinton. In fact, 49% of all traffic stops made by the Clinton Police Department involve non-resident drivers. In addition, 36% of all traffic stops made by the Clinton Police Department take place on state highways. Given the large number of non-resident drivers stopped on state highways for traffic violations, any comparisons utilizing the population of the city of Clinton are inherently flawed.

Agency response

The city of Creve Coeur is a “crossroads” in the St. Louis Metropolitan area, having five major roadways (interstate and state designated highways) passing through or immediately adjacent to the city. Creve Coeur is home to numerous employees and businesses, as well as one of the largest medical services communities in the region. Drivers of all races regularly visit and/or work in Creve Coeur, resulting in a greater representation of minorities than reflected by the city’s population and ultimately a higher disparity index. Creve Coeur is ranked in the top 20 communities in Missouri regarding traffic collisions, not to mention the city is currently involved in a work-zone project along two major roadways. To that end, the Creve Coeur Police Department executes an aggressive traffic safety program. The Creve Coeur Police Department strives to be professional in all public contacts.

Agency response

The city of Festus has a large interstate highway (I-55) that runs down the middle of the city. This interstate brings several thousand people from outside the area to our city. Our city also has several large retail establishments that people from all over come to patronize. There are several restaurants, gas stations and hotels near our interstate exits that have the ability to cater to a large driving population.

Agency response

The present method used to determine profiling is not truly reflective, because it is based solely on the population of the jurisdiction served and does not take into consideration the major highways and arterial roads, as well as large shopping districts and the number of individuals employed within the jurisdiction. Furthermore, until the mentioned factors are taken into account, any inferences to racial profiling cannot and should not be concluded. This department does not and will not tolerate any enforcement based solely on race or gender.

Agency response

The city of Gladstone has three state highways and one interstate highway that run through the area. In addition there is a major home improvement center located in the southwest corner of the city. This is a center that draws retail business from throughout the area including residents from the state of Kansas. This center also is located in close proximity to three of the four highways that run through Gladstone. It should also be noted that the city of Gladstone is entirely landlocked by Kansas City, Missouri with major thoroughfares that allow travel by Kansas City residents. A review of the data submitted shows that 21% of the blacks and 15% of the Native Americans that my officers came into contact with occurred during stops on the highways that run through our city. In addition, when looking at the resident status of the drivers stopped 15% of the black drivers, 30% of the Hispanic drivers, and 21% of the Native American drivers were Gladstone residents. This would indicate that the majority of the drivers in each instance lived somewhere other than Gladstone. If this information was being utilized in the calculation of the disparity index, which measures against the community's population figures, then the disparity index should drop proportionately.

Agency response

Glendale is a bedroom community in St. Louis County. Although we have a small minority population, we share borders with the cities of Kirkwood, Rock Hill and Webster Groves, who have a more diverse population. Missouri State Route 100 is a highly traveled east/west thoroughfare, which is our northern boundary. Berry Road and Lockwood Boulevard are major streets that convey traffic to Interstate 44, which is just south of our city limits. There are four major shopping centers within a short driving distance. (Average daily traffic counts as of October 2000: State Route 100 - 29,046; Berry Road - 9,590; Lockwood Boulevard - 11,490; Sappington Road - 7,000)

Agency response

The information contained within this report indicates that the “disparity index” for stopping blacks in Grain Valley is 7.92, which indicates over representation. It should be noted that of the 1,454 stops made by Grain Valley Police for the year 2002, there were only 47 blacks stopped. However, because of the number of blacks stopped and the small local population of blacks in Grain Valley (0.41%), the "disparity index" calculation results in an over-inflated number. Additionally, I-70 runs through the community with east and west bound exit ramps into Grain Valley where large numbers of motorists stop because of the three service stations/truck stops that are located adjacent to the interstate. Also Grain Valley is located within the metroplex of Kansas City that has a relatively large black population. In conclusion, I don't believe from the "disparity index" one can conclude Grain Valley Police are targeting blacks as indicated by the raw numbers versus the index figures.

Agency response

Harrisonville is located approximately 30 miles south of Kansas City on U.S. Hwy. 71. This highway and several state highways are used daily by commuters driving to and from their places of employment in the Kansas City Metropolitan area. There thoroughfares are also used by countless numbers of families traveling back and forth to the lakes and vacation spots around the state.

Agency response

The city of Hazelwood has three major highways within our jurisdiction: I-270 which travels through the city; I-70, which culminates in the city at I-270; and Highway 370. In addition, the city also has three major north/south arterial roadways through our city, which are Lindbergh Blvd. (US 67), Hanley Road and Howdershell Road. The average daily traffic flow on these six roadways is approximately 300,000 vehicles daily. The city of Hazelwood is home to over 850 businesses, including the Ford Motor Company Assembly Plant, Boeing Corporation, Malinkrodt Inc., General Motors Parts Plant, United States Postal Service Bulk Mail Facility, IBM, etc. These businesses employ thousands of individuals from across the metropolitan area, including the state of Illinois and the surrounding Missouri counties of St. Charles, Jefferson, Franklin, etc. who travel the streets of the city of Hazelwood to and from their places of employment.

Agency response

When the total minority population of the county is less than 1%, a single traffic stop creates a statistical aberration in the disparity index. This is evident in the distortion reflected for Hickory County caused by one traffic stop of one black motorist for the entire year of 2002.

Agency response

The Higginsville Police Department patrols a 7-mile section of Missouri Highway 13 which intersects with I-70. Many vehicle stops do not involve the local population. Numerous orchards are located to the north of Higginsville. Seasonal workers live in the area but are not counted in the census population totals.

Agency response

U.S. Highway 54, connecting I-70 and Jefferson City, runs through the middle of the city. In most stops the officer does not know the apparent race of the driver until after the stop is conducted. The city of Holts Summit has two activity rental facilities available. The facilities are rented by large groups of blacks and Hispanics on a regular basis, significantly increasing the percentage of those races in our local population.

Agency response

The Independence Police Department, an internationally accredited law enforcement agency, by policy and practice, does not tolerate any form of bias-based profiling. The racial makeup of our motoring public does not reflect the racial makeup of our population due to our close proximity to KCMO and other neighboring cities with significant minority populations. Other factors include major east/west highways entering the city, including I-70, KCMO public schools in Independence, major retail shopping and entertainment destinations, and a lack of IA complaints from motorists citing racial profiling as the basis for being stopped.

Agency response

The report prepared by the Attorney General's Office may provide an incomplete picture of traffic stop activities by the Joplin Police Department and other Missouri law enforcement agencies, by comparing individual agency traffic stop data against local jurisdiction demographics collected in the 2000 census. For those agencies whose officers are likely to encounter a high proportion of non-residents traveling through their jurisdiction, demographics of the driving population could be significantly different from the demographics of the agency's resident population. A 1999 study for the city of Joplin indicated that 28% of the vehicles entering Joplin each day are registered outside the city of Joplin. The presence of large employment, retail, commercial and medical sites within Joplin results in a daily service population in excess of 225,000, five times greater than the resident population. Until valid data on the demographics of "the population of minority groups residing or traveling within the jurisdiction" is generated, comparisons of traffic stop data to local resident population demographics could easily lead to erroneous conclusions about law enforcement activities.

Agency response

While the data contained in this report represents the overall number of stops, searches and arrests collected by the Kansas City Missouri Police Department, the disparity indexes have not fluctuated significantly since the data collection began in 2000. However, these number should still be interpreted cautiously. Specifically, relying on the census population for ages 16 and over as a benchmark does not provide a realistic picture of the driving population in Kansas City, Missouri at any given time. There are several major thoroughfares that run through the city, including I-29, I-35 and I-70 that contain a large percentage of drivers not reflected in the static census population used for comparison purposes. Additionally, Kansas City is contained within a metropolitan population of approximately 1.5 million, which adds to the commuter population on the major thoroughfares. The report also indicates that a disproportionate number of persons searched were black (64%) as compared to white (28%). One reason for this difference can be seen in an examination of searches incident to arrest. 68% of searches of black persons were conducted incident to arrest. Further, 57% of the searches incident to arrests were based on outstanding warrants. It should also be noted that KCPD views traffic stop data collection as one of many tools to address the issue of racial profiling. Other tools in use by the department include training, community programs and policies.

Agency response

Lafayette County has a major interstate highway that traverses the county from west to east. The majority of our traffic stops and arrests occur during the evening and night shift. Most of our stops and arrests are of persons that are not residents of our county, using the interstate highway or other state highways located within our county.

Agency response

This disparity represents blind enforcement. Officers rarely know the ethnicity of the violator while conducting enforcement activities, especially after dark.

Agency response

Interstate 70 borders Lake St. Louis on the north and U.S. Highway 40/61 passes through the city near our southern boundary. 47.8% of the traffic stops initiated with black drivers occurred on the interstate and 21.4% occurred on the U.S. highway. Most of the traffic stops involving black drivers (69.2%) were conducted on these major highways, not on city streets. It is reasonable, therefore, to consider the statewide population for minorities when evaluating the disparity index for our venue. When this criterion for comparison is used, the disparity index for blacks drops from 5.76 to 1.01. Similarly, 61.8% of traffic stops involving Hispanic drivers were conducted on these highways as were 36.4% of the stops involving American Indian drivers and 73% of stops with Asian drivers. 56.1% of stops conducted with white drivers occurred on one occurred on one or the other of these major highways.

Note: Several years ago our agency formed a dedicated traffic unit in response to concern over the number of fatal accidents that had occurred on the two major highways crossing our municipality. The goal of this unit is to increase enforcement of traffic laws, reduce hazardous moving violations in those areas and to save lives. The program has been very successful, resulting in hundreds of alcohol-impaired drivers being removed from the roads and lowering the number of fatal accidents reported the year before the program was initiated to zero deaths in 2002.

Agency response

The 20,840 population used in this report does not reflect the true demographics of the city of Maryland Heights. Maryland Heights has 1,813 businesses which employ 52,233 people. The city contains Harrah's Casino which had 6 million visitors in 2002. The 20,000-seat UMB Bank Pavilion Amphitheater had 380,000 visitors in 2002. The city has 20 hotels with 3,249 rooms. Maryland Heights has 61 liquor establishments selling alcohol by the drink. Finally, the section of I-270 in Maryland Heights has an average daily traffic count of 182,000 vehicles, the second highest in the state. The demographics of the 66,430,000 vehicles on I-270, the 6 million visitors to the casino, the 380,000 visitors to the amphitheater and the 52,233 people employed in Maryland Heights are not known but surely impact the validity of this report.

Agency response

The data submitted of 2002 was correctly reported, However the Milan community has a pork processing plant (Premium Standard Foods) that employs many Hispanics and some blacks. This racial population changes frequently, so the 2000 census may not accurately reflect the current population ratio. Also, many of the employees are within a 50-mile radius of Milan.

Agency response

We have a state penitentiary that opened in our county in October of 2001, employing approximately 400. Interstate 57 runs the full length of our county connecting major cities such as Chicago to Tulsa and Chicago to Memphis.

Agency response

The city of Monett has a large population of stationary and migrant Hispanics due to the large number of poultry processing plants in Monett and the surrounding area.

Agency response

It is significant that our community is located adjacent to an interstate highway with a major shopping mall. It is obvious that a total of three non-white searches cannot be statistically or otherwise significant of any factors regarding racial profiling. This law requires a substantial increase in paperwork for this department. The members of the state legislature should be cognizant of the fact that no extra funding came with this law and other laws that have been recently passed.

Agency response

The city of Olivette has two major highways within its boundaries - I-70 is on the east and Highway 340 (Olive Blvd.) is a pipeline connecting thousands of people traveling into and through Olivette for business and pleasure. Olivette has several employers that employ hundreds of people. Over 53,000 vehicles utilize Olive Blvd. each day. Traffic enforcement along with vehicle accident investigations and other highway incidents is a majority of the police department duties. In 2002 we increased the traffic enforcement which lowered the accident rate. The Olivette Police Department is committed to making the streets within our boundaries as safe as possible for all people living, visiting, working or traveling through our city.

Agency response

We have two banks, one feed store and two convenience stores. We are opening a processing plant in November. Most people work in Springfield; this is farming country.

Agency response

The statistics for the year 2001 do not reflect addresses of all traffic stops, nor is it a requirement. At the beginning of 2002, we began to include the addresses of all traffic stops, These statistics show that approximately 70% of the persons stopped do not live in our city.

Agency response

The city of Richmond Heights is a 2.8 sq. mile city located on the western boundaries of the city of St. Louis. Richmond Heights has three miles of U.S. 64 (Highway 40) running directly through it. Highway I-170 runs north and south from U.S. 64. Located in the city limits is the Galleria shopping mall. The Galleria mall generates approximately 10 million shoppers or visitors each year. Richmond Heights has numerous office buildings including the 23-story University Club Towers office building. Richmond Heights also borders the city of Clayton, which is the county seat for St. Louis County. Thousands of vehicles travel through Richmond Heights on a daily basis due to its geographic location.

Agency response

The Shrewsbury Police Department is committed to the fair treatment of all citizens and visitors of our community. We support the Missouri Attorney General's efforts to better understand traffic enforcement activity and patterns. However, since the data in the Attorney General's report is deceptive in nature and not interpretive, further analysis of traffic stops, arrests and searches is needed so that more meaningful interpretations of the data can be made. Race-neutral explanations need to be considered and ruled out before any possible conclusions relating to disparate treatment can be drawn. Furthermore, we believe it would be more prudent to examine traffic enforcement activity in terms of the population that travels upon a community's roadways rather than its resident population. This would allow the data to then be examined in a much more appropriate context that would take in to account the diversity of the surrounding region and the uniqueness of the motoring population of each individual community.

Agency response

The analysis does not consider the fact that 28% of the city's total traffic stops are non-residents. The Attorney General's analysis only compares the traffic stop data to the census population. Springfield is situated on Interstate 44 and is a destination for tourists traveling south to Branson and to the local Bass Pro Shops, the number one tourist attraction in the state of Missouri. Additionally, when examining the search rates, the probable cause/authority to search reasons should be taken into consideration.

Agency response

The city of St. Ann has several small shopping malls as well as one very large mall, Westfield Shoppingtown Northwest, which is located on St. Charles Rock Road at Lindbergh. Many stores at the Westfield Shoppingtown have fashions and accessories that are marketed to the black community. Many African-Americans come from North St. Louis County, North St. Louis City and East St. Louis to shop at this mall. That will cause our black population to actually be several times greater than what the census shows. St. Ann also has an interstate highway (I-70) and it has an active speed enforcement program on that highway.

Agency response

There are unique circumstances that affect the demographics of Saint Charles City. There are two major interstate highways: I-70 and I-370 in St. Charles City providing access from east and west. There is a major state highway - Missouri Route 94 providing access north and south (although considered east/west) through St. Charles City. The Ameristar Casino in St. Charles City employs many individuals and has customers from the greater St. Louis Metropolitan area. Criminal activity in St. Charles City is to some degree attributable to persons who reside outside St. Charles City and who live in the greater St. Louis Metropolitan area. St. Charles City has several major shopping centers to include Bass Pro, Sam's Retail Outlet, Wal-Mart, Lowe's, Home Depot, Target Store, etc. Since the last census, there has been an influx of legal and illegal aliens into St. Charles City.

Agency response

The disparity index is skewed when comparing the number of stops to proportion of population. Our population is 11.87% black; however, 42.4% of summons issued to blacks were on a state highway. St. Charles Rock Road (Hwy. 180) traverses east to west through St. John and has a very high percentage of black motorists using this street as a direct conduit for shopping at Northwest Plaza, a large mall about two miles west of this city. Furthermore, there are three supermarkets along St. Charles Rock Road and one twenty-four hour store in St. John that are heavily shopped by blacks who live immediately to the east of St. John since there are no stores in their immediate vicinity. Immediately to the east of St. John is Pagedale, Wellston and St. Louis City which are 95-plus percent populated by black residents. Therefore, if the disparity index would be calculated based upon the proportion of stops divided by the percentage of blacks driving on the streets through St. John, the results would be well below a value of one.

Agency response

The percent of total persons stopped during 2002 (white - 48.2%; black 48.6%) is proportional to the St. Louis population for persons age 16 and over (white 47.6%; black 46.6%). While the report reflects that 6.5% of the persons stopped were searched, a disproportionate number of the persons searched were black (77.2%) as compared to white (21.2%). One of the primary reasons for this difference is the requirement for a search incident to a lawful arrest. Of the persons searched because of this requirement, 78.8% were black as compared to 20.5% who were white. The major reason for an arrest was the existence of outstanding warrants (white - 140; black 1,020). Also, the number of blacks consenting to a search (609) was greater than the number of whites (192). The rates in the 2002 report remain consistent with the previous reports.

Agency response

While the data compiled in this report is informative, any conclusions drawn from the data must be tempered with common sense. For example, population data used to calculate the disparity index does not include members of the minority community that reside in the city of St. Louis and therefore increases the diversity of drivers on the roads within St. Louis County. Nor does the data reflect that in a majority of traffic stops, police officers do not know the race of the driver prior to initiating the traffic stop. The St. Louis County Police Department has a long standing policy prohibiting all investigative detentions, traffic stops, arrests, searches or seizures of property based solely on race, ethnicity, gender, sexual orientation, religious beliefs, disability or economic level. All commissioned officers participate in annual cultural diversity and sensitivity training and specialized training which prohibits the illegal practice of racial profiling. The St. Louis County Police Department will continue to gather and monitor the data required in this report to ensure our officers continue to respect the right of every individual.

Agency response

St. Robert has adjoining boundaries with a major army installation, Fort Leonard Wood, with a daytime population of approximately 30,000. St. Robert borders with heavy traffic on Interstate 44. The city accommodates many visitors during peak activities on Fort Leonard Wood such as basic training graduations and other events.

Agency response

Three major highways, two federal and one state, crisscross Town and Country and carry an estimated 400,000-plus vehicles through our community daily. The intersection of I-64 and I-270, located within the city, is reported to be one of the top five busiest intersections in the state. Analysis shows that the overwhelming majority of the department's traffic enforcement occurs on these three highways and that the city's residential population is in the minority in comparison to others traveling through, visiting, worshiping, shopping or working within its boundaries. It can be reasonably concluded that the racial makeup of those utilizing these highways is more proportionate to a combination of state, county and St. Louis City populations and associated ratios than to the city of Town and Country proper. Therefore, it is our belief that the city's traffic enforcement activities are in harmony with both the intent and provisions of the state's Racial Profiling Law requiring that vehicle stops be proportionate to the population groups residing or traveling within its jurisdiction.

Agency response

Our population is unique because of our role in the community. We are a university police department with approximately 15,000 students and another 3,000 faculty and staff personnel during the course of a day, and only 1,500 - 2,000 occupants at night. Our student population is a diverse mix of international students and local community participants. Furthermore the “transient” or “passing through” driving population is such that it is not measurable. There is no real community or city to base our population on that would be an accurate depiction of our university. In addition, the amount of visitors to our campus for various functions is also variable. It is unknown what percentages of stops are made on the university population and the number that is transient.

Agency response

The city of Webster Groves is less than two miles outside of the city of St. Louis and is part of a major metropolitan area whose population travels daily upon its streets. A major interstate highway and several north/south feeder streets are included in the traffic network and are heavily traveled by non-residents in their commute to work and business. In addition, Webster Groves has several shopping and recreational areas that are heavily patronized by a large number of non-residents. This transient population is well documented in that over 80% of traffic citations are issued to non-residents. Consequently, any statistical model not closely reflecting the populations of St. Louis City and County that travel through Webster Groves will not be reliable.

Agency response

The following is offered as additional information to further clarify and help put the data in fuller context. Located within the city limits are six major chain hotels and three major chain car rental agencies who employ Blacks as a large percentage of their work force. Woodson Terrace is bordered to the east by the city of Berkeley, whose majority population is black. Located within the city are two Mexican groceries, one Hispanic currency exchange, and an insurance brokerage firm whose primary clients and work force are Hispanic. I-70 and state highway 115 travel east and west through the city and state highway EE travels north and south with these major routes connecting Woodson Terrace to the surrounding and outlying area. The northern city limits adjoin Lambert St. Louis International Airport which attracts a diverse segment of the population (including black and Hispanic) with access gained via I-70 and state highway 115.
